

How to set up gmail e-mail?

1. To send Gmail emails from within OZOLS TMS, follow these steps:

1) Open a Google account and authorize:

<https://myaccount.google.com/>

2) Opens the **Security section**

3) Activate **two-step** authentication (a confirmation code will be sent to the phone)

4) Select App passwords

Signing in to Google

Password	Last changed Jul 21, 2009	>
2-Step Verification	☒ On	>
App passwords	None	>

4) Choose Other (Custom name)

← App passwords

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

You don't have any app passwords.

Select the app and device you want to generate the app password for.

Select app

Select device

Mail

Calendar

Contacts

YouTube

Other (Custom name)

GENERATE

5) Type "Ozols" in the window and press **GENERATE**

← App passwords

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

You don't have any app passwords.

Select the app and device you want to generate the app password for.

CLOUDEX TMS

×

GENERATE

5) A gmail password for the OZOLS TMS system is created

5) This password must be entered in the user's email settings in CLOUDEX TMS by following the [instructions here](#).
